RoHS Statement

KWG Industries is not a manufacturer and does not produce any materials. We are a distributor of metals. RoHS compliance is ultimately determined by the producing Mill. Mill Certifications are supplied with orders upon request.

In the event RoHS complaint material is required on a purchase order, we will review the material certifications for a RoHS complaint statement on the mills' certifications. However, we do not perform additional chemical testing.

On our website, we also offer informational links to mills' Material Safety Data Sheets (MSDS) at: www.kwgindustries.com

Thank you,
KWG Industries, LLC
